
Channel 1: first recorded sine trial
Nominal prediction
Orientation-derived measurement
Bend angle (rad)
Only l2 and l3 receive the nonlinear bound force
l1 = -l2-l3
l2
l3
+35 mm
-35 mm
Simulated length change (mm)
Channel 2: first recorded sine trial
Bend angle (rad)
Only l2 and l3 receive the nonlinear bound force
Simulated length change (mm)
Channel 3: first recorded sine trial
Bend angle (rad)
Only l2 and l3 receive the nonlinear bound force
Simulated length change (mm)
Trial elapsed simulation time (s)
